AFFIDAVIT OF POSTING:

I, _____, certify that CB-1819 was posted at the authorized posting places in the City of Northglenn this _____ day of _____, 2014.

Deputy City Clerk

FINANCE MEMORANDUM
#14-04

DATE: March 10, 2014

TO: Honorable Mayor Joyce Downing and City Council Members

FROM: John R. Pick, City Manager 
Jason Loveland, Director of Finance 
David Willett, Director of Public Works 

SUBJECT: CB – 1819 Water & Wastewater Rate Increase

BACKGROUND:

The City of Northglenn provides water and wastewater services to approximately 10,250 customer accounts. The services are primarily funded via water and wastewater charges collected from utility customers. To ensure that future water and wastewater charges would meet the future costs of providing such services (e.g. water rights, operations, maintenance, capital etc.), the City, in 2005, contracted with Red Oak Consulting to develop a water and wastewater rate study.

The study determined that, in order to meet the funding and service requirements of the water and wastewater functions, revenue collections would need to increase approximately 7.5% to 8% annually in each of the subsequent five years beginning in 2009. Based on the information presented in the study, the City has increased its water and wastewater rates in 2009, 2010, and 2011. The proposed increase will be the fourth of the five-year rate increase recommendations. As a result of the three years of increases, revenue collections have increased an average of 2.12% annually since 2008, despite average water consumption falling by nearly 10%. Reductions in water consumption have been attributed to above normal precipitation, conservation efforts, the recent economic recession, and increasing water rates.

UPDATE:

At the March 3rd Study Session, City Council discussed the proposed water and wastewater rate increase.

In accordance with the rate study recommendations, staff has created and attached a worksheet which details the proposed 2014 rate increases by category. A water and wastewater rate comparison with other local municipalities has also been provided using the proposed 2014 rates. The proposed rates were gathered directly from the rate study provided by Red Oak Consulting and are anticipated to increase water and wastewater revenue collections by \$696,298 or 7.61% (given similar water consumption rates as those experienced throughout an average precipitation year).

Listed below are future capital improvement projects, and their estimated costs, needed at the wastewater treatment plant to address regulatory, operational, and capacity requirements:

- 2015 – 2016
 - Headworks and Secondary Clarifier - \$7,310,000
 - Decommission Intake Lagoons - \$1,440,000

- 2019 – 2021
 - Bull Reservoir Effluent Pumping, pH control - \$368,000
 - Lift Station “A” (second phase improvements) - \$660,000
 - Expanded Lab and Operations Space - \$600,000
 - Pave Access Roads - \$565,000
 - Force Main “A” Redundant Pipeline - \$12,000,000

- 2024 – 2026
 - Primary Clarifier, Biosolids Handling System, Decommission Sludge Lagoons - \$21,200,000

- Future Needs
 - Expand BNR Capacity, Develop Alternative for Class A Biosolids - \$8,700,000

These projects, along with water rights acquisitions, general maintenance projects, and maintaining adequate operating and capital reserves are the drivers for the rate increase.

The monthly bill for the average residential customer will change as shown below:

Avg. Monthly Winter Consumption – 5,000 Gallons →	2013 = \$40.69
	2014 = \$44.95

Avg. Monthly Summer Consumption – 15,000 Gallons →	2013 = \$81.89
	2014 = \$89.70

Should the City Council approve the rate increase set forth by the Red Oak study, the proposed rates would become effective April 1st. The Public Hearing for the rate increase will be held on March 24th.

PROS/CONS:

The additional revenue generated will help fund the replacement and repair of the City’s aging water and sewer infrastructure along with operating expenditures.

Rate increases reinforce conservation efforts among consumers.

The proposed increases will place an additional financial burden on all utility customers regardless of income or ability.
