Your Touchstone Energy® Cooperative 

Map of service locations

- We serve 8 meter locations

Items provided by United Power

- Annual reports
- Capital Contributions
 - 2021 Capital Credits = \$5,697.67
- Community/Civic Support
 - ACREP
 - Northglenn/Thornton Rotary
 - Safe Street Halloween
 - Smart Commute Metro North
 - Associate Member of CML

UNITED POWER

Your Touchstone Energy® Cooperative

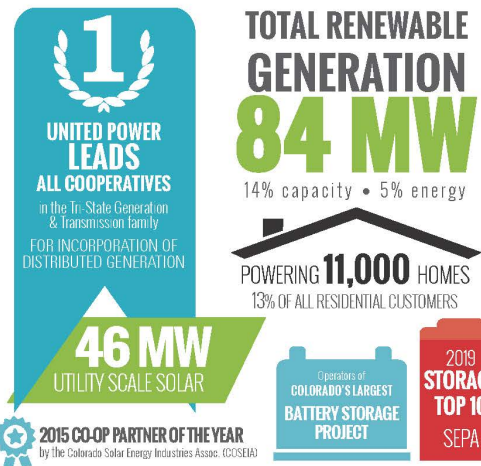

RENEWABLE ENERGY REPORT | 2021

United Power continues to be a leader in renewable energy integration. Since United Power energized Colorado's first community solar farm, the cooperative has continued to look for new and unique ways to integrate renewable sources.

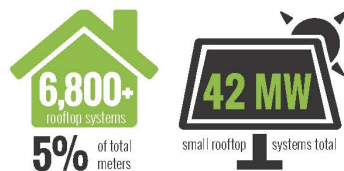

United Power recognizes that the future of electrical generation will be an "all of the above" strategy of investing in a variety of generation sources, and responding to the wants and needs of our membership. Projects like our large scale solar fields and the methane recapture plant make sense on multiple fronts. These

projects reduce carbon emissions, but they also make economic sense. They produce generation that we can purchase for our members at a predictable cost, with a predictable lifespan.

The addition of these projects, from our utility scale solar farms to our state-leading battery storage facility, helps us build some cost stability for our members.

Rooftop Solar

RANKED 5th in the nation among co-ops for cumulative solar installations

2018 Utility Solar Market Snapshot - July 2019
The Smart Electric Power Alliance (SEPA)

Major Renewable Milestones

2009	2011	2012	2016	2017	2018	2018	2020
First community solar in Colorado 32 members lease 96 panels located on United Power's property	Erie Landfill Methane to Megawatts project 3 MW 90% baseload powering 2,400 homes	United Power's first utility scale solar 2 MW Hanger 160 Solar Field powering 333 homes	Silicon Ranch Partnership energized 20.5 MW utility scale solar Ft. Lupton: 13MW Mead: 7.5MW	Third Silicon Ranch Partnership 16 MW solar field powering 4,500 homes	Record year for rooftop solar 1,000 rooftop systems added/ 6 MW of solar added in one year ranked 1st in the nation for rooftop solar growth	United Power & Engie North America energize two Tesla Battery Storage Systems totaling 4.5 MW / 18 MWH	An additional 6 MW of utility-scale solar energized December 2020

Green House Gas emissions and Solar

Underground Fund balance

Balance as of September 2021 = \$195,959.00

- 2021 September YTD allocation = \$4,041.00

Thank you for the time
